GPS SERIES PUMP SHOTGUNS

ULTRA SHORT ACTION GEOMETRIC PUMP SYSTEM

RETAY

BETTER BUILT BARRELS. BETTER
SHOOTING GUNS

The all new GPS (Geometric Pump System) pump shotgun line offers Retay's revolutionary "Floating-Forearm" Technology, a design that allows ultra-fast, ultra-short cycling for quick follow-up shots when you need them. Dual slides on the forearm eliminate twist, resulting in a smooth and solid feel.

The GPS line offers deep bore drilled barrels that include an optimized forcing cone resulting in the same dead-straight shots that are characteristic of all Retay shotguns. The GPS has a 5+1 magazine capacity, and comes complete with Cylinder, Modified and Full interchangeable choke tubes and a Retay 5- Year limited factory warranty.

Deep Bore Drilled

MARABARREL

Each GPS, X, XL shotgun is built around Retay's unique deep bore drilled barrel. Deep bore drilling produces a more consistent bore diameter and does not stress the steel the way that hammer forging does. The result is the most straight and accurate shotgun barrel possible.

LENGTHENED FORCING CONE

All Retay Shotguns come with a factory lengthened and optimized forcing cone. The optimized forcing cone in combination with our drilled barrels has been shown to put over 20% more pellets on target when compared with barrels made by other leading manufacturers.

MARAPRO CHOKE

All GPS hunting shotguns use Retay's Interchangeable 7cm long Marapro chokes™. The chokes are designed to create better shot pattern and optimize barrel weight.
